

Instead of using oak and other slow-growing hardwood species we use Hevea Brasiliensis – an environmentally friendly plantation hardwood similar in strength and density as white oak (a species native to the USA) – to create the core of our engineered hardwood flooring.

Using Hevea Brasiliensis delivers greater dimensional stability and is able to withstand external stressors like temperature fluctuations, moisture and air, making it the ideal timber to use as the core layer of our engineered hardwood floors.

H EVEA BRASILIANENSIS

HEVEA - AT THE HEART OF OUR FLOORS

- > Hevea brasiliensis is a plantation hardwood timber known for its density and durability.
- > Using Hevea to create our specially formulated core ensures our engineered flooring is strong, stable and durable.
- > Hevea is a renewable plantation hardwood species so it's also planet friendly.

Hevea brasiliensis plantation

Hevea core

Provides strength and durability

CORE STRUCTURE

SCIENTIFICALLY FORMULATED FLOORS ENGINEERED FOR LIVING

- > Intelligent engineering within the Hevea core means once installed our flooring will sense and acclimatise to its surrounding environment to create the perfect fit.
- > The scientifically formulated Hevea core ensures our floors can withstand external pressure to change. Our floors are less likely than traditional timber flooring to expand, contract or move when exposed to moisture, humidity or temperature extremes.
- > Incorporating a Hevea core enables us to provide the dimensional stability needed to make the beautiful 400mm wide planks favoured by interior designers and homeowners worldwide.
- > No unpleasant surprises! Our wood is treated with a natural mineral pesticide that is safe for family and pets to eliminate fungi and borer pests.

C O M P O S I T I O N

THE WHOLE IS GREATER THAN THE SUM OF ITS PARTS

From foundation to precious hardwood surface
each individual layer of our engineered flooring is best in-class.
Together the result is unparalleled.

> From Oak to Ash, Maple to Merbau and Walnut to Wenge we have a huge range of sustainably sourced, stunning hardwoods to choose from.

> We only produce premium quality products and, unlike other flooring suppliers, we do not use veneers.

Hardwood surface

> Our wide choice of beautiful hardwoods is available in surface thickness of either 3.2 or 6mm.

> Our hand-crafted surface treatments and textures combine artisanal detail with the latest technology to create a floor that is unique to your home.

Top coat

Our finishes include a large range of colours and stains which are protected with premium top coats of either 7 layers of scratch resistant UV urethane or 3 layers of UV oil.

Core layer

At the heart of every floor is our specially formulated pattern of Hevea hardwood which gives our flooring its core strength and stability.

Foundation layer

The final timber foundation gives additional stability and durability to the floor.
